

Community Inspired Spaces

**RJM** DESIGN GROUP

Landscape Architecture | Master Planning | Design | Construction Administration

Established in 1987, RJM Design Group has evolved into a multi-disciplinary planning and landscape architectural design firm committed to serving the needs of public agencies and organizations throughout the West. Our team of dynamic individuals includes licensed landscape architects, architects, designers and planners, many of whom are LEED Accredited Professionals. Our work evolves from a careful evaluation of the program, site character, community needs, sustainability, budget, maintenance and safety.

Our mission is to assist communities in the planning and design of environments that enhance the quality of life for all. We believe quality design is the physical expression of fundamentally sound ideas, infused with imagination and creativity.

The design of community facilities that fit within the environmental context of the site is a specialty of our team. Our work evolves from a careful evaluation of existing site character, site accessibility, program needs, resource conservation, sustainability, budget, community outreach, maintenance practices and safety. Our goal is the development of community facilities that contribute to a cohesive sense of place and become a source of pride in the community.

"RJM Design Group does amazing, great work! What the residents said, as well as the feedback received, has been eye-opening."

*Hector Kistemann  
Director of Parks & Recreation  
City of San Dimas*

"The Master Plan Update was long overdue. RJM Design Group produced a strong product. The participation process will make this report a usable document that will not just sit on a shelf."

*Kevin Hawkins  
Director of Community Services  
City of Temecula*

It is our experience that through sound design, detail, and execution of fundamental trail improvements, a sense of quality and character will be conveyed to visitors and the local community.
